Anti-Human Adipolean Variant Antibody
Catalog # ABG10005

Specification

Anti-Human Adipolean Variant Antibody - Product Information

Application	**WB, E**
Reactivity	**Human**
Host	**Rabbit**
Clonality	**Polyclonal**

Anti-Human Adipolean Variant Antibody - Additional Information

Preparation
Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hAdipolean Variant. Anti-Human Adipolean Variant specific antibody was purified by affinity chromatography employing immobilized hAdipolean Variant matrix.

WesternBlot
To detect hAdipolean Variant by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hAdipolean Variant is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

Sandwich
To detect hAdipolean Variant by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human Adipolean Variant ( ) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hAdipolean Variant.

Storage
-20°C

Precautions
Anti-Human Adipolean Variant Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human Adipolean Variant Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
