

Biotinylated Anti-Human CTACK Antibody
Catalog # ABG10052**Specification**

Biotinylated Anti-Human CTACK Antibody - Product Information

Application	WB, E
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

Biotinylated Anti-Human CTACK Antibody - Additional Information**Preparation**

Produced from sera of rabbits immunized with highly pure recombinant Human CTACK. Anti-Human CTACK specific antibody was purified by affinity chromatography and then biotinylated.

WesternBlot

To detect Human CTACK by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 mg/ml. When used in conjunction with compatible development reagents the detection limit for recombinant Human CTACK is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

Sandwich

To detect Human CTACK by sandwich ELISA (using 100 ml/well) a concentration of 0.25 - 1.0 µg/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with BioGems's Polyclonal Anti- Human CTACK (60-106P) as a capture antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant Human CTACK.

Direct

To detect Human CTACK by direct ELISA (using 100 ml/well) a concentration of approximately 1.0 µg/ml of this antibody is required. This biotinylated polyclonal antibody allows the detection of at least 0.2 - 0.4 ng/well of recombinant Human CTACK.

Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile PBS containing 0.1% BSA to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Biotinylated Anti-Human CTACK Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Biotinylated Anti-Human CTACK Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
