

Biotinylated Anti-Human FGF-10 Antibody

Catalog # ABG10100

## Specification

# **Biotinylated Anti-Human FGF-10 Antibody - Product Information**

Application Reactivity Host Clonality WB, E Human Goat Polyclonal

### **Biotinylated Anti-Human FGF-10 Antibody - Additional Information**

#### Preparation

Produced from sera of goats pre-immunized with highly pure (>98%) recombinant hFGF-10. Anti-Human FGF-10 specific antibody was purified by affinity chromatography and then biotinylated.

#### WesternBlot

To detect hFGF-10 by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2  $\mu$ g/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hFGF-10 is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

### Sandwich

To detect hFGF-10 by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.25 – 1.0  $\mu$ g/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with BioGems' Polyclonal Anti-Human FGF-10 (60-139P) as a capture antibody, allows the detection of at least 0.2 – 0.4 ng/well of recombinant hFGF-10.

#### Direct

To detect hFGF-10 by direct ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.25 – 1.0  $\mu$ g/ml of this antibody is required. This biotinylated polyclonal antibody, in conjunction with compatible secondary reagents, allows the detection of at least 0.2 – 0.4 ng/well of recombinant hFGF-10.

### Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

#### Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile PBS containing 0.1% BSA to a concentration of 0.1-1.0 mg/ml.

Storage -20°C

#### Precautions

Biotinylated Anti-Human FGF-10 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# **Biotinylated Anti-Human FGF-10 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
