

Anti-Human Flt3-Ligand Antibody
Catalog # ABG10117**Specification**

Anti-Human Flt3-Ligand Antibody - Product Information

Application	WB, E
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

Anti-Human Flt3-Ligand Antibody - Additional Information**Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hFlt-3 Ligand. Anti-Human Flt-3 Ligand specific antibody was purified by affinity chromatography employing immobilized hFlt-3 Ligand matrix.

WesternBlot

To detect hFlt-3 Ligand by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hFlt-3 Ligand is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

Sandwich

To detect hFlt-3 Ligand by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems's Biotinylated Anti-Human Flt-3 Ligand (60-147BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hFlt-3 Ligand.

Neutralization

To yield one-half maximal inhibition [**ND**">₅₀] of the biological activity of hFlt-3 Ligand (1.0 ng/ml), a concentration of 4.0-6.0 ng/ml of this antibody is required.

Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Anti-Human Flt3-Ligand Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human Flt3-Ligand Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
