

## Anti-Human gAcrp30/Adipolean Antibody

Catalog # ABG10123

#### **Specification**

# Anti-Human gAcrp30/Adipolean Antibody - Product Information

Application WB, E
Reactivity Human
Host Goat
Clonality Polyclonal

### Anti-Human gAcrp30/Adipolean Antibody - Additional Information

#### **Preparation**

Produced from sera of goats pre-immunized with highly pure (>98%) recombinant hgAcrp30/Adipolean. Anti-Human gAcrp30/Adipolean specific antibody was purified by affinity chromatography employing immobilized hgAcrp30/Adipolean matrix.

#### WesternBlot

To detect hgAcrp30/Adipolean by Western Blot analysis this antibody can be used at a concentration of 0.1 -  $0.2~\mu g/ml$ . Used in conjunction with compatible secondary reagents the detection limit for recombinant hgAcrp30/Adipolean is 1.5 - 3.0~ng/lane, under either reducing or non-reducing conditions.

#### Sandwich

To detect hgAcrp30/Adipolean by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.5 - 2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human gAcrp30/Adipolean (60-152BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hgAcrp30/Adipolean.

## **Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

### Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

## **Storage**

-20°C

### **Precautions**

Anti-Human gAcrp30/Adipolean Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## Anti-Human gAcrp30/Adipolean Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

Western Blot

• Blocking Peptides

- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
