

Anti-Human Heregulinβ-1 Antibody

Catalog # ABG10155

Specification

Anti-Human Heregulinß-1 Antibody - Product Information

Application WB, IHC, E
Reactivity Human
Host Rabbit
Clonality Polyclonal

Anti-Human Heregulinβ-1 Antibody - Additional Information

Preparation

Produced from sera of rabbits immunized with highly pure recombinant Human Heregulin- $\beta1$. Anti-Human Heregulin- $\beta1$ specific antibody was purified by affinity chromatography employing an immobilized Human Heregulin- $\beta1$ matrix.

WesternBlot

To detect Human Heregulin- $\beta 1$ by Western Blot analysis this antibody can be used at a concentration of 0.1 - $0.2~\mu g/ml$. When used in conjunction with compatible secondary reagents, the detection limit for recombinant Human Heregulin- $\beta 1$ is 1.5 - 3.0~ng/lane, under either reducing or non-reducing conditions.

Sandwich

To detect Human Heregulin- $\beta1$ by sandwich ELISA (using 100μ I/well antibody solution) a concentration of 0.5 - $2.0~\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human Heregulin- $\beta1$ (60-176BT) as a detection antibody, allows the detection of at least 0.2 - $0.4~\eta$ g/well of recombinant Human Heregulin- $\beta1$.

Immunohistochemistry

This antibody stained formalin-fixed, paraffin-embedded sections of human normal breast. The recommended concentration is 0.125 mg/mL-0.0625 mg/mL with an overnight incubation at 4°C. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 6.0 sodium citrate buffer is recommended. Optimal concentrations and conditions may vary.

Neutralization

To yield one-half maximal inhibition [ND₅₀] of the biological activity of Human Heregulin- $\beta1$ (1.0 ng/ml), a concentration of 0.7-1.1 μ g/ml of this antibody is required.

Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage -20°C

Precautions

Anti-Human Heregulin β -1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human Heregulinβ-1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
