Rabbit
Polyclonal

Anti-Human IFN-y Antibody - Additional Information

Preparation

Produced from sera of rabbits pre-immunized with highly pure recombinant Human IFN- γ . Anti-Human IFN- γ specific antibody was purified by affinity chromatography employing immobilized Human IFN- γ matrix.

WesternBlot

To detect Human IFN- γ by Western Blot analysis this antibody can be used at a concentration of 0.1- 0.2 μ g/ml. When used in conjunction with compatible secondary reagents, the detection limit for recombinant Human IFN- γ is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

Sandwich

To detect Human IFN- γ by sandwich ELISA (using 100 μ l/well antibody solution) a concentration of 0.5 - 2.0 μ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human IFN- γ (60-182BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 μ g/well of recombinant Human IFN- γ .

Immunohistochemistry

This antibody stained formalin-fixed, paraffin-embedded sections of human cervical squamous cell carcinoma. The recommended concentration is $0.5~\mu g/ml$ - $0.25\mu g/ml$ with an overnight incubation at 4°C. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 6.0 sodium citrate buffer is recommended. Optimal concentrations and conditions may vary.

Neutralization

To yield one-half maximal inhibition [ND_{>50}] of the biological activity of Human IFN- γ (10 ng/ml), a concentration of 0.13-0.20 µg/ml of this antibody is required.

Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Tel: 858.875.1900 Fax: 858.875.1999

Anti-Human IFN-y Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human IFN-y Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
