

Anti-Human IL-11 Antibody
Catalog # ABG10199**Specification**

Anti-Human IL-11 Antibody - Product Information

Application	WB, IHC, E
Reactivity	Human
Host	Mouse
Clonality	Monoclonal

Anti-Human IL-11 Antibody - Additional Information**Preparation**

Produced in BALB/c x ICR F₁ mice using highly pure (>98%) recombinant human IL-11 as the immunizing antigen. This IgG1_K antibody was purified from cell culture by Protein G affinity chromatography.

WesternBlot

To detect hIL-11 by Western Blot analysis this antibody can be used at a concentration of 1.0-2.0 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hIL-11 is 0.25-0.50 ng/lane, under non-reducing conditions.

Sandwich

In a sandwich ELISA (assuming 100µl/well), a concentration of 8.0-9.0 µg/ml of this antibody will detect recombinant human IL-11 when used with BioGems' biotinylated antigen affinity purified anti-human IL-11 (60-011BT) as the detection antibody at a concentration of approximately 2.0-4.0 µg/ml.

Immunohistochemistry

This antibody stained human brain stroke (including control cortex and stroke core areas) tissue. The primary antibody was incubated at 2.5 µg/ml overnight at 4°C. This was followed by a fluorophore conjugated secondary antibody. Optimal concentrations and conditions may vary.
Information and photo are courtesy of the Tissue Profiling group, SciLifeLab Stockholm.

Formulation

A sterile filtered antibody solution was lyophilized from PBS.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Anti-Human IL-11 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human IL-11 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
