

**Anti-Human IL-1 $\alpha$  Antibody**  
**Catalog # ABG10235****Specification**

---

**Anti-Human IL-1 $\alpha$  Antibody - Product Information**

Application	<b>WB, IHC, E</b>
Reactivity	<b>Human</b>
Host	<b>Rabbit</b>
Clonality	<b>Polyclonal</b>

**Anti-Human IL-1 $\alpha$  Antibody - Additional Information****Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hIL-1 $\alpha$ . Anti-Human IL-1 $\alpha$  specific antibody was purified by affinity chromatography employing immobilized hIL-1 $\alpha$  matrix.

**WesternBlot**

To detect hIL-1 $\alpha$  by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2  $\mu$ g/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hIL-1 $\alpha$  is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

**Sandwich**

To detect hIL-1 $\alpha$  by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.5 - 2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems's Biotinylated Anti-Human IL-1 $\alpha$  (60-001ABT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hIL-1 $\alpha$ .

**Immunohistochemistry**

This antibody stained formalin-fixed, paraffin-embedded sections of normal human skin. The recommended concentration is 1.0  $\mu$ g/ml overnight at 4°C. An HRP-labeled polymer detection system was used with a non-alcohol soluble AEC chromogen. Enzyme induced antigen retrieval was performed with proteinase K. Optimal concentrations and conditions may vary.

**Neutralization**

To yield one-half maximal inhibition [**ND**"><sub>50</sub></span>] of the biological activity of hIL-1 $\alpha$  (20 ng/ml), a concentration of 1.0 - 2.0  $\mu$ g/ml of this antibody is required.

**Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

**Reconstitution**

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

**Storage**

-20°C

**Precautions**

Anti-Human IL-1 $\alpha$  Antibody is for research use only and not for use in diagnostic or therapeutic

procedures.

### **Anti-Human IL-1 $\alpha$ Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
