

Anti-Human IL-2 Antibody

Catalog # ABG10248

## Specification

# **Anti-Human IL-2 Antibody - Product Information**

Application	WB, IHC, E
Reactivity Host	Human Rabbit
Clonality	Polyclonal

## **Anti-Human IL-2 Antibody - Additional Information**

#### Preparation

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hIL-2. Anti-Human IL-2 specific antibody was purified by affinity chromatography employing immobilized hll-2 matrix.

#### WesternBlot

To detect hIL-2 by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hIL-2 is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

### Sandwich

To detect hIL-2 by sandwich ELISA (using 100  $\mu$ /well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human IL-2 (60-002BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hIL-2.

#### Immunohistochemistry

This antibody stained formalin-fixed, paraffin-embedded sections of human breast invasive ductal carcinoma. The recommended concentration is 0.125µg/ml-0.250µg/ml with an overnight incubation at 4°C. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 6.0 sodium citrate buffer is recommended. Optimal concentrations and conditions may vary.

#### Neutralization

To yield one-half maximal inhibition [<strong>ND</strong><span style="font-size: 16px;"><sub>50</sub></span>] of the biological activity of hIL-2 (0.8 ng/ml), a concentration of  $0.26 - 0.40 \mu g/ml$  of this antibody is required.

Formulation A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage -20°C

Precautions

Anti-Human IL-2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## Anti-Human IL-2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
