

## **Anti-Murine JE/MCP-1 Antibody**

Catalog # ABG10324

## Specification

# **Anti-Murine JE/MCP-1 Antibody - Product Information**

Application WB, IHC, E
Reactivity Mouse
Host Rabbit
Clonality Polyclonal

### Anti-Murine JE/MCP-1 Antibody - Additional Information

#### **Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant mJE(MCP-1). Anti-Murine JE(MCP-1) specific antibody was purified by affinity chromatography employing immobilized mJE (MCP-1) matrix.

#### WesternBlot

To detect mJE(MCP-1) by Western Blot analysis this antibody can be used at a concentration of  $0.1-0.2 \mu g/ml$ . Used in conjunction with compatible secondary reagents the detection limit for recombinant mJE(MCP-1) is  $1.5-3.0 \mu g/me$ , under either reducing or non-reducing conditions.

#### Sandwich

To detect mJE(MCP-1) by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.5 - 2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Murine JE(MCP-1)(61-083BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant mJE(MCP-1).

### **Immunohistochemistry**

This antibody stained colchicine injected mouse brain (including caudate putamen) tissue. The primary antibody was incubated at 1.0 mg/ml overnight at 4°C. This was followed by a peroxidase conjugated secondary antibody and then a fluorescein Tyramide Signal Amplification (TSA™) reagent. Optimal concentrations and conditions may vary.

#### Neutralization

To yield one-half maximal inhibition [<strong>ND</strong><span style="font-size: 16px;"><sub>>50</sub></span>] of the biological activity of mJE(MCP-1) (100 ng/ml), a concentration of 4.0-6.0 µg/ml of this antibody is required.

#### **Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

#### Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

## **Storage**

-20°C

#### **Precautions**

Anti-Murine JE/MCP-1 Antibody is for research use only and not for use in diagnostic or therapeutic

procedures.

# Anti-Murine JE/MCP-1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
