

Anti-Human MIP-3 α Antibody
Catalog # ABG10417**Specification**

Anti-Human MIP-3 α Antibody - Product Information

Application	WB, E
Reactivity	Human
Host	Mouse
Clonality	Monoclonal

Anti-Human MIP-3 α Antibody - Additional Information**Preparation**

Produced in mice using highly pure recombinant human MIP-3 α as the immunizing antigen. This IgG1_K antibody was purified from cell culture by Protein A affinity chromatography.

WesternBlot

To detect Human MIP-3 α by Western Blot analysis this antibody can be used at a concentration of 0.20-0.40 μ g/ml. When used in conjunction with compatible secondary reagents, the detection limit for recombinant Human MIP-3 α is 0.25-0.50 ng/lane, under non-reducing conditions.

Sandwich

In a sandwich ELISA (assuming 100 μ l/well), a concentration of 2.0-4.0 μ g/ml of this antibody will detect at least 1000 pg/ml of recombinant Human MIP-3 α when used with BioGems's; biotinylated antigen affinity purified anti-Human MIP-3 α (60-227BT) as the detection antibody at a concentration of approximately 1.0-2.0 μ g/ml.

Formulation

A sterile filtered antibody solution was lyophilized from PBS.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Anti-Human MIP-3 α Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human MIP-3 α Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
