

Anti-Human NAP-2 Antibody

Catalog # ABG10431

Specification

Anti-Human NAP-2 Antibody - Product Information

Application WB, E
Reactivity Human
Host Mouse
Clonality Monoclonal

Anti-Human NAP-2 Antibody - Additional Information

Preparation

Produced in BALB/c mice using highly pure (>98%) recombinant human NAP-2 as the immunizing antigen. This IgG1_K antibody was purified from cell culture by ammonium sulfate co-precipitation.

WesternBlot

To detect hNAP-2 by Western Blot analysis this antibody can be used at a concentration of 0.5-1.0 μ g/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hNAP-2 is 0.5-1.0 μ g/lane, under reducing or non-reducing conditions.

Sandwich

In a sandwich ELISA (assuming 100μ l/well), a concentration of 2.0-4.0 µg/ml of this antibody will detect at least 500 pg/ml of recombinant human NAP-2 when used with BioGems' biotinylated antigen affinity purified anti-human NAP-2 (60-242BT) as the detection antibody at a concentration of approximately 0.5-1.0 µg/ml.

Formulation

A sterile filtered antibody solution was lyophilized from PBS.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Anti-Human NAP-2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human NAP-2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot

- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
