

Anti-Human NT-3 Antibody

Catalog # ABG10442

## Specification

# **Anti-Human NT-3 Antibody - Product Information**

Application Reactivity Host Clonality WB, E Human Goat Polyclonal

## **Anti-Human NT-3 Antibody - Additional Information**

#### Preparation

Produced from sera of goats pre-immunized with highly pure (>98%) recombinant hNT-3. Anti-Human NT-3 specific antibody was purified by affinity chromatography employing immobilized hNT-3 matrix.

### WesternBlot

To detect hNT-3 by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2  $\mu$ g/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hNT-3 is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

#### Sandwich

To detect hNT-3 by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.5 - 2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human NT-3 (60-252BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hNT-3.

#### Neutralization

To yield one-half maximal inhibition [<strong>ND</strong><span style="font-size: 16px;"><sub>50</sub></span>] of the biological activity of hNT-3 (50.00 ng/ml), a concentration of 2.0-4.0 µg/ml of this antibody is required.

#### Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

## Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage -20°C

#### Precautions

Anti-Human NT-3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## Anti-Human NT-3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
