Anti-Rat RANTES Antibody
Catalog # ABG10469

Specification

Anti-Rat RANTES Antibody - Product Information

Application	**WB, IHC, E**
Reactivity	**Rat**
Host	**Rabbit**
Clonality	**Polyclonal**

Anti-Rat RANTES Antibody - Additional Information

Preparation
Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant Rat RANTES. Anti-Rat RANTES specific antibody was purified by affinity chromatography employing immobilized Rat RANTES matrix.

WesternBlot
To detect Rat RANTES by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant Rat RANTES is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

Sandwich
To detect Rat RANTES by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Rat RANTES (62-071BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant Rat RANTES.

Immunohistochemistry
This antibody stained colchicine injected rat brain (somatosensory cortex) tissue. The primary antibody was incubated at 1.0 mg/ml overnight at 4˚C. This was followed by a peroxidase conjugated secondary antibody and then a fluorescein Tyramide Signal Amplification (TSA™) reagent. Optimal concentrations and conditions may vary.
 Information and photo are courtesy of the Tissue Profiling group, SciLifeLab Stockholm.

Formulation
A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution
Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage
-20°C

Precautions
Anti-Rat RANTES Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Rat RANTES Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
