

Anti-Human sCD22 Antibody

Catalog # ABG10485

Specification

Anti-Human sCD22 Antibody - Product Information

Application WB, E
Reactivity Human
Host Rabbit
Clonality Polyclonal

Anti-Human sCD22 Antibody - Additional Information

Preparation

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hCD22. Anti-Human CD22 specific antibody was purified by affinity chromatography employing immobilized hCD22 matrix.

WesternBlot

To detect hCD22 by Western Blot analysis this antibody can be used at a concentration of $0.1 - 0.2 \, \mu g/ml$. Used in conjunction with compatible secondary reagents the detection limit for recombinant hCD22 is $1.5 - 3.0 \, ng/lane$, under either reducing or non-reducing conditions.

Sandwich

To detect hCD22 by sandwich ELISA (using 100 μ l/well antibody solution) a concentration of 0.5 - 2.0 μ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human CD22 (60-096BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hCD22.

Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Anti-Human sCD22 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human sCD22 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot

• <u>Immunohistochemistry</u>

- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
