

Anti-Human SDF-1β Antibody

Catalog # ABG10504

## Specification

# Anti-Human SDF-1β Antibody - Product Information

Application Reactivity Host Clonality WB, IHC, E Human Goat Polyclonal

## Anti-Human SDF-1β Antibody - Additional Information

## Preparation

Produced from sera of goats pre-immunized with highly pure recombinant Human SDF-1 $\beta$ . Anti-Human SDF-1 $\beta$  specific antibody was purified by affinity chromatography employing immobilized Human SDF-1 $\beta$  matrix.

### WesternBlot

To detect Human SDF-1 $\beta$  by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. When used in conjunction with compatible secondary reagents, the detection limit for recombinant Human SDF-1 $\beta$  is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

## Sandwich

To detect Human SDF-1 $\beta$  by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.5 - 2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human SDF-1 $\beta$  (60-295BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant Human SDF-1 $\beta$ .

### Immunohistochemistry

This antibody stained formalin-fixed, paraffin-embedded sections of human pancreas malignant adenocarcinoma. The recommended concentration is 2.5-5.0 µg/mL with an overnight incubation at 4°C. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 9.0 buffer is recommended. Optimal concentrations and conditions may vary. <br/> <br/> <br/> <br/> <br/> <br/> <span style="font-size: 10px;"><em>Tissue samples were provided by the Cooperative Human Tissue Network, which is funded by the National Cancer Institute. <br/> <br/> > Information and photo are courtesy of Flagship Biosciences, LLC – Histology Services.</br/>

#### Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

### Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage -20°C

#### Precautions

Anti-Human SDF-1β Antibody is for research use only and not for use in diagnostic or therapeutic

procedures.

# Anti-Human SDF-1β Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
