

### **Anti-Galanin Picoband Antibody**

Catalog # ABO10093

# Specification

# **Anti-Galanin Picoband Antibody - Product Information**

Application WB
Primary Accession A00606-1
Host Reactivity Mouse, Rat
Clonality Polyclonal
Format Lyophilized

**Description** 

Rabbit IgG polyclonal antibody for Galanin detection. Tested with WB in Human; Mouse; Rat.

### Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

# **Anti-Galanin Picoband Antibody - Additional Information**

**Application Details** 

Western blot, 0.1-0.5 µg/ml<br>

**Subcellular Localization** 

Secreted.

#### **Contents**

Each vial contains 4mg Trehalose, 0.9mg NaCl, 0.2mg Na<sub>2</sub>HPO<sub>4</sub>, 0.05mg NaN<sub>3</sub>.

#### **Immunogen**

A synthetic peptide corresponding to a sequence of human Galanin (WTLNSAGYLLGPHAVGNHRSFSDKNGLTS).

### **Cross Reactivity**

No cross reactivity with other proteins.

Storage At -20°C; for one year. After r°Constitution,

at 4°C; for one month. It°Can also be aliquotted and stored frozen at -20°C; for a longer time. Avoid repeated freezing and

thawing.

# **Anti-Galanin Picoband Antibody - Protein Information**

#### **Anti-Galanin Picoband Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# Anti-Galanin Picoband Antibody - Background

Galanin is a neuropeptide encoded by the GAL gene, that is widely expressed in the brain, spinal cord, and gut of humans as well as other mammals. This gene encodes a neuroendocrine peptide that is widely expressed in the central and peripheral nervous systems and also the gastrointestinal tract, pancreas, adrenal gland and urogenital tract. The encoded protein is a precursor that is proteolytically processed to generate two mature peptides: galanin and galanin message-associated peptide (GMAP). Galanin has diverse physiological functions including nociception, feeding and energy homeostasis, osmotic regulation and water balance. GMAP has been demonstrated to possess antifungal activity and hypothesized to be part of the innate immune system.
