

Hsp60 Antibody

Rabbit Polyclonal Antibody Catalog # ABV10071

Specification

Hsp60 Antibody - Product Information

Application WB
Primary Accession P10809
Other Accession ACE069
Reactivity Human

Host Clonality Isotype

Calculated MW

ACE06961
Human, Mouse, Rat
Rabbit
Polyclonal
Rabbit IgG

61055

Hsp60 Antibody - Additional Information

Gene ID 3329

Application & Usage Western blot analysis (0.5-4 μg/ml).

However, the optimal conditions should be determined individually. The antibody recognizes ~60 kDa of Hsp60 from samples

of human, mouse and rat origins.

Reactivity to other species has not been

determined.

Other Names

HSPD1, HuCHA60, chaperonin, CPN60, SPG13, HSP65, Hsp60, GROEL, HSP-60, HSP60

Target/Specificity

Hsp60

Antibody Form

Liquid

Appearance

Colorless liquid

Formulation

 $100~\mu g$ (0.5 mg/ml) affinity purified rabbit anti-human Hsp60 polyclonal antibody in phosphate (PBS, pH 7.2) containing 30% glycerol, 0.5 % BSA and 0.01% thimerosal.

Handling

The antibody solution should be gently mixed before use.

Reconstitution & Storage

-20 °C

Background Descriptions

Precautions

Hsp60 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Hsp60 Antibody - Protein Information

Name HSPD1

Synonyms HSP60

Function

Chaperonin implicated in mitochondrial protein import and macromolecular assembly. Together with Hsp10, facilitates the correct folding of imported proteins. May also prevent misfolding and promote the refolding and proper assembly of unfolded polypeptides generated under stress conditions in the mitochondrial matrix (PubMed:1346131, PubMed:11422376). The functional units of these chaperonins consist of heptameric rings of the large subunit Hsp60, which function as a back- to-back double ring. In a cyclic reaction, Hsp60 ring complexes bind one unfolded substrate protein per ring, followed by the binding of ATP and association with 2 heptameric rings of the co-chaperonin Hsp10. This leads to sequestration of the substrate protein in the inner cavity of Hsp60 where, for a certain period of time, it can fold undisturbed by other cell components. Synchronous hydrolysis of ATP in all Hsp60 subunits results in the dissociation of the chaperonin rings and the release of ADP and the folded substrate protein (Probable).

Cellular Location

Mitochondrion matrix.

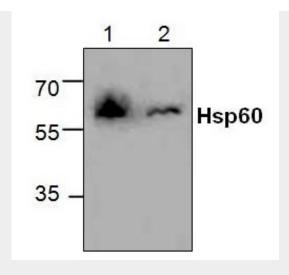

Hsp60 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Hsp60 Antibody - Images

Western blot analysis of Hsp60 using Jurkat cell lysate (Lane 1 &2).

Hsp60 Antibody - Background

Hsp60, also known as Cpn60, is an abundant protein synthesized constitutively in the cell that is induced to a higher concentration after brief cell stress or shock. It is present in all species analyzed so far and exhibits a remarkable sequence homology among various counterparts in bacteria, plants, and mammals with more than half of the residues identical between bacterial and mammalian Hsp60.
