

HADH/HCDH Antibody

Rabbit Polyclonal Antibody Catalog # ABV10208

Specification

HADH/HCDH Antibody - Product Information

Application Primary Accession Reactivity Host Clonality Isotype Calculated MW WB <u>Q9WVK7</u> Human, Mouse, Rat Rabbit Polyclonal Rabbit IgG 34448

HADH/HCDH Antibody - Additional Information

Gene ID 113965

Positive Control

Application & Usage

Jurkat cell lysate, mouse 3T3 cell lysate, and rat kidney tissue lysate The antibody can be used for Western blot analysis (1-4 µg/ml). However, the optimal conditions should be determined individually. Blocking peptide is available separately.

Other Names Hydroxyacyl-coenzyme A dehydrogenase

Target/Specificity HADH/HCDH

Antibody Form Liquid

Appearance Colorless liquid

Formulation

100 μ g (0.5 mg/ml) affinity purified rabbit anti-HADH/HCDH polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 5 mM EDTA and 0.01% thimerosal.

Handling The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

HADH/HCDH Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

HADH/HCDH Antibody - Protein Information

Name Hadh

Synonyms Had, Hadhsc, Schad

Function

Mitochondrial fatty acid beta-oxidation enzyme that catalyzes the third step of the beta-oxidation cycle for medium and short-chain 3-hydroxy fatty acyl-CoAs (C4 to C10) (By similarity). Plays a role in the control of insulin secretion by inhibiting the activation of glutamate dehydrogenase 1 (GLUD1), an enzyme that has an important role in regulating amino acid-induced insulin secretion (By similarity).

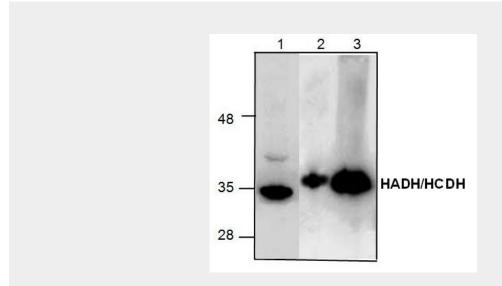

Cellular Location Mitochondrion matrix {ECO:0000250|UniProtKB:P00348}

HADH/HCDH Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

HADH/HCDH Antibody - Images

Western blot analysis of HADH/HCDH using Jurkat cell lysate (Lane 1), mouse 3T3 cell lysate (Lane 2) and rat kidney tissue lysate (Lane 3).

HADH/HCDH Antibody - Background

L-3-hydroxyacyl-CoA dehydrogenase (HADH/HCDH) is a mitochondrial matrix protein expressed in pancreas, liver, heart, kidney and skeletal muscle. L-3-hydroxyacyl-CoA dehydrogenase catalyzes the oxidation of straight-chain 3-hydroxyacyl-CoAs as part of the beta-oxidation pathway. Its enzymatic activity is highest with medium-chain-length fatty acids. Mutations in this gene can lead to HADH ($3-\alpha$ -hydroxyacyl-CoA dehydrogenase) deficiency and familial hyperinsulinemic hypoglycemia 4 (HHF4).
