

Mek1/2 Antibody

Rabbit Polyclonal Antibody Catalog # ABV10378

Specification

Mek1/2 Antibody - Product Information

Application Primary Accession Other Accession Reactivity Host Clonality Isotype WB <u>Q02750.2</u> <u>NP_002746.1</u> Human, Mouse, Rat Rabbit Polyclonal Rabbit IgG

Mek1/2 Antibody - Additional Information

Application & Usage

Western blotting (1:500-1000). However, the optimal concentrations should be determined individually. The antibody recognizes 45 kDa Mek1/2 of human, mouse, and rat origins.

Other Names MAPK , Erk, Dual specificity mitogen-activated protein kinase kinase 1/2; MAP kinase kinase 1/2; MAPKK 1/2; ERK activator kinase 1/2; MAPK/ERK kinase 1/2; MEK 1/2

Target/Specificity Mek 1/2

Antibody Form Liquid

Appearance Colorless liquid

Formulation

100 μl purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 50% glycerol, 1% BSA, and 0.02% sodium azide.

Handling The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

Mek1/2 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Mek1/2 Antibody - Protein Information

Mek1/2 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

Mek1/2 Antibody - Background

MAP kinase kinase 1 (Mek1), also known as mitogen activated protein kinase kinase, MAP kinase kinase, ERK kinase 1 or microtubule-associated protein 2 kinase, is a 43 kDa dual-specificity protein kinase that phosphorylates threonine and tyrosine residues on MAP kinases such as Erk 1 and 2. Mek1 and Mek2 are involved in a diverse array of cellular processes such as stress-activated response, apoptosis, cytokine-induced cell proliferation, and DNA recombination during meiosis. Mek1 and Mek2 are activated by phosphorylation on serine 218 and 222 by serine-threonine kinase, Raf-1, which is part of the p21ras signal transduction pathway.
