HDAC8 Antibody - Additional Information

Gene ID 70315

Application & Usage Western blotting (0.5-4 μg/ml),

WB, IHC, IP

Polyclonal

Rabbit IgG

Q8VH37

Human Rabbit

41772

immunoprecipitation (10-20 μ g/ml), and Immunohistochemistry (10-20 μ g/ml). However, the optimal concentrations should be determined individually.

Other Names HD8, RPD3, HDACL1

Target/Specificity

HDAC8

Antibody Form Liquid

Appearance Colorless liquid

Formulation

 $100~\mu g$ (0.2 mg/ml) protein A purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

Handling

The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

HDAC8 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

HDAC8 Antibody - Protein Information

Name Hdac8

Function

Histone deacetylase that catalyzes the deacetylation of lysine residues on the N-terminal part of the core histones (H2A, H2B, H3 and H4). Histone deacetylation gives a tag for epigenetic repression and plays an important role in transcriptional regulation, cell cycle progression and developmental events. Histone deacetylases act via the formation of large multiprotein complexes. Also involved in the deacetylation of cohesin complex protein SMC3 regulating release of cohesin complexes from chromatin. May play a role in smooth muscle cell contractility. In addition to protein deacetylase activity, also has protein-lysine deacylase activity: acts as a protein decrotonylase by mediating decrotonylation ((2E)-butenoyl) of histones.

Cellular Location

Nucleus {ECO:0000250|UniProtKB:Q9BY41}. Chromosome {ECO:0000250|UniProtKB:Q9BY41}. Cytoplasm {ECO:0000250|UniProtKB:Q9BY41}. Note=Excluded from the nucleoli. Found in the cytoplasm of cells showing smooth muscle differentiation {ECO:0000250|UniProtKB:Q9BY41}

HDAC8 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

HDAC8 Antibody - Background

Mammalian HDAC-8, isolated from human kidney, is a member of the histone deacetylase family. HDAC-8 shares homology with other HDACs in the family, but has different tissue distribution. HDAC-8 is localized to the nucleus and plays a role in the tissue development as well as cancer etiology.
