### **Claspin Antibody - Additional Information**

**Gene ID 63967** 

Calculated MW

Application & Usage

Western blotting (1:500 - 1:2000) and Immunoprecipitation. HeLa cell extract can be used as a positive control. However, the optimal concentrations should be determined individually. The antibody recognizes the Claspin of human origin. Reactivity to other species has not been tested.

**Other Names** 

Clspn

**Target/Specificity** 

Claspin

**Antibody Form** 

Liquid

**Appearance** 

Colorless liquid

## **Formulation**

 $100~\mu l$  affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 1% BSA and 0.02% thimerosal.

#### Handling

The antibody solution should be gently mixed before use.

**Reconstitution & Storage** 

-20 °C

**Background Descriptions** 

Tel. 000.070.1900 Fax. 000.070.199

#### **Precautions**

Claspin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### **Claspin Antibody - Protein Information**

Name CLSPN (HGNC:19715)

#### **Function**

Required for checkpoint mediated cell cycle arrest in response to inhibition of DNA replication or to DNA damage induced by both ionizing and UV irradiation (PubMed: <a href="https://www.upingstone/library/12766152">https://www.upingstone/library/12766152</a>

href="http://www.uniprot.org/citations/12766152" target="\_blank">12766152</a>, PubMed:<a href="http://www.uniprot.org/citations/15190204" target="\_blank">15190204</a>, PubMed:<a href="http://www.uniprot.org/citations/15707391" target="\_blank">15707391</a>, PubMed:<a href="http://www.uniprot.org/citations/16123041" target="\_blank">16123041</a>). Adapter protein which binds to BRCA1 and the checkpoint kinase CHEK1 and facilitates the ATR-dependent phosphorylation of both proteins (PubMed:<a href="http://www.uniprot.org/citations/12766152" target="\_blank">12766152</a>, PubMed:<a href="http://www.uniprot.org/citations/15707391" target="\_blank">15707391</a><a href="http://www.uniprot.org/citations/15096610" target="\_blank">15096610</a>, PubMed:<a href="http://www.uniprot.org/citations/16123041" target="\_blank">16123041</a>, PubMed:<a href="http://www.uniprot.org/citations/16123041"

href="http://www.uniprot.org/citations/15226314" target="\_blank">15226314</a>, PubMed:<a href="http://www.uniprot.org/citations/35585232" target="\_blank">35585232</a>, PubMed:<a href="http://www.uniprot.org/citations/34694004" target="\_blank">34694004</a>). Important for initiation of DNA replication, recruits kinase CDC7 to phosphorylate MCM2-7 components (PubMed:<a href="http://www.uniprot.org/citations/27401717" target=" blank">27401717</a>).

**Cellular Location** 

Nucleus.

### **Claspin Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# Claspin Antibody - Images

# Claspin Antibody - Background

Claspin is a checkpoint protein that interacts with and regulates checkpoint kinase 1 (Chk1) in response to replication stress. The interaction between claspin and Chk1 has been demonstrated to be required for ATR-dependent Chk1 activation. The interaction involves the phosphorylation of

Tel: 858.875.1900 Fax: 858.875.1999

claspin that may be accomplished by Chk1 kinase activity. Claspin has been found to localize to chromatin in both the presence and absence of damaged DNA and to associate with PCNA, as an essential component of the DNA replication machinery. This association with the replication machinery may indicate a role for claspin in linking replication to DNA damage signaling and Chk1 activation.
