

### **CCR4 Antibody**

Rabbit Polyclonal Antibody Catalog # ABV10631

# **Specification**

### **CCR4 Antibody - Product Information**

Application WB
Primary Accession P51679

Reactivity Human, Mouse, Dog

Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Calculated MW 41403

## **CCR4 Antibody - Additional Information**

**Gene ID 1233** 

Application & Usage Western blotting (2-6 μg/ml). However, the

optimal concentrations should be

determined individually.

**Other Names** 

C-C chemokine receptor 4, CCR 4, chemokine C C motif receptor 4, C-C CKR-4, K5-5

Target/Specificity

CCR4

**Antibody Form** 

Liquid

**Appearance** 

Colorless liquid

### **Formulation**

 $100 \mu g$  (0.5 mg/ml) affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA, and 0.01% thimerosal.

# **Handling**

The antibody solution should be gently mixed before use.

**Reconstitution & Storage** 

-20 °C

**Background Descriptions** 

#### **Precautions**

CCR4 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### **CCR4 Antibody - Protein Information**

#### Name CCR4

### Synonyms CMKBR4

#### **Function**

High affinity receptor for the C-C type chemokines CCL17/TARC, CCL22/MDC and CKLF isoform 1/CKLF1. The activity of this receptor is mediated by G(i) proteins which activate a phosphatidylinositol-calcium second messenger system. Can function as a chemoattractant homing receptor on circulating memory lymphocytes and as a coreceptor for some primary HIV-2 isolates. In the CNS, could mediate hippocampal-neuron survival.

### **Cellular Location**

Cell membrane; Multi-pass membrane protein.

#### **Tissue Location**

Predominantly expressed in the thymus, in peripheral blood leukocytes, including T-cells, mostly CD4+ cells, and basophils, and in platelets; at lower levels, in the spleen and in monocytes (PubMed:10754297, PubMed:9169480). Detected also in macrophages, IL-2-activated natural killer cells and skin-homing memory T-cells, mostly the ones expressing the cutaneous lymphocyte antigen (CLA). Expressed in brain microvascular and coronary artery endothelial cells (PubMed:10754297).

### **CCR4 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## **CCR4 Antibody - Background**

CCR4 is a chemokine receptor and is preferentially expressed on type 2 helper T (Th2-type) cells. In contrast to other chemokine receptors, the expression of CCR4 and CCR8 on Th2 cells is transiently increased following TCR and CD28 engagement. Moreover, activated Th1 cells up-regulate CCR4 expression and functional responsiveness to thymus- and activation-regulated chemokine.
