

IGF-BP3 Antibody

Rabbit Polyclonal Antibody Catalog # ABV11054

Specification

IGF-BP3 Antibody - Product Information

Application WB
Reactivity Human
Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG

IGF-BP3 Antibody - Additional Information

Application & Usage

Western blotting (2-6 μ g/ml). However, the optimal conditions should be determined individually. Recombinant human IGFBP-3 can be used as a positive control. Other applications have not been determined.

Target/Specificity IGF-BP3

Antibody Form Liquid

AppearanceColorless liquid

Formulation

 $200 \mu g$ (0.5 mg/ml) affinity purified rabbit polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol and 0.01% thimerosal.

Handling

The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

IGF-BP3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

IGF-BP3 Antibody - Protein Information

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>

IGF-BP3 Antibody - Protocols

- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

IGF-BP3 Antibody - Background

Human IGF-BP3, also known as growth-hormone-dependant binding protein, is a 28.9 kDa cysteine-rich secreted protein. It is the major IGF binding protein present in the plasma of human and animals. In addition to its ability to modulate the activity of IGF-I and IGF-2, IGF-BP3 also exerts inhibitory effects on follicle stimulating hormone (FSH) activity. Decreased plasma levels of IGF-BP3 often results in dwarfism, whereas elevated levels of IGF-BP3 may lead to acromegaly. The expression of IGF-BP3 in fibroblasts is stimulated by mitogenic growth factors such as Bombesin, Vasopressin, PDGF, and EGF.
