

# ROR2 Antibody (CT)

Rabbit Polyclonal Antibody Catalog # ABV11251

### Specification

## **ROR2** Antibody (CT) - Product Information

Application	
Primary Accession	
Reactivity	
Host	
Clonality	
Isotype	
Calculated MW	

WB, IHC <u>Q01974</u> Human Rabbit Polyclonal Rabbit IgG 104757

#### **ROR2** Antibody (CT) - Additional Information

Gene ID 4920

Positive Control

Western Blot: 293 cell lysate, IHC: Paraffin embedded human cancer tissue Western blot: 1:1000, IHC: 1:50 to 1:100

Application & Usage Western blot: 1:1000, IHC: 1:50 to 1:100 Other Names ROR2, NTRKR2, Tyrosine-protein kinase transmembrane receptor ROR2; Neurotrophic tyrosine kinase, receptor-related 2

Target/Specificity ROR2

Antibody Form Liquid

Appearance Colorless liquid

Formulation 100  $\mu$ l of antibody in PBS with 0.09% (W/V) sodium azide

Handling The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

**Background Descriptions** 

Precautions

ROR2 Antibody (CT) is for research use only and not for use in diagnostic or therapeutic procedures.

## **ROR2** Antibody (CT) - Protein Information

Name ROR2

Synonyms NTRKR2

Function

Tyrosine-protein kinase receptor which may be involved in the early formation of the chondrocytes. It seems to be required for cartilage and growth plate development (By similarity). Phosphorylates YWHAB, leading to induction of osteogenesis and bone formation (PubMed:<a href="http://www.uniprot.org/citations/17717073" target="\_blank">17717073</a>). In contrast, has also been shown to have very little tyrosine kinase activity in vitro. May act as a receptor for wnt ligand WNT5A which may result in the inhibition of WNT3A-mediated signaling (PubMed:<a href="http://www.uniprot.org/citations/25029443" target="\_blank">25029443</a>).

**Cellular Location** Cell membrane; Single-pass type I membrane protein

#### **ROR2 Antibody (CT) - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- **Blocking Peptides**
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

### **ROR2 Antibody (CT) - Background**

ROR2 (receptor tyrosine kinase-like orphan receptor 2), also known as neurotrophic tyrosine kinase receptor-related 2 (NTRKR2), is a single pass transmembrane tyrosine-protein kinase receptor. It contains a cytoplasmic tyrosine kinase domain, distally located serine-threonine-rich domains, an extracellular immunoglobulin-like domain, a cysteine-rich domain and a kringle domain. ROR2 is important for skeletal and endocrine development and is required for cartilage and growth plate development. It promotes the differentiation of osteoblasts and plays an important role in the early formation of chondrocytes. ROR2 may play differential roles during the development of the nervous system. ROR2 sequesters and associates with Dlxin-1 affecting the transcriptional function of Msx-2. ROR2 also interacts with canonical Wnt1 and Wnt3, regulating their signaling pathways. Defects in ROR2 can result in the autosomal dominant skeletal disorder, brachydactylic type B1 or the autosomal recessive skeletal disorder, Robinow syndrome.
