

ApoA5 Antibody (NT)
Rabbit Polyclonal Antibody
Catalog # ABV11267**Specification**

ApoA5 Antibody (NT) - Product Information

Application	WB, IHC
Primary Accession	Q6Q788
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	41213

ApoA5 Antibody (NT) - Additional Information**Gene ID** 116519

Positive Control	Western blot: HL60 cell lysate, IHC: human hepatocarcinoma tissue
Application & Usage	Western blot: ~1:1000, IHC: ~1:10-1:50.

Other Names

APOA5; RAP3; Apolipoprotein A-V; Apolipoprotein A5; Regeneration-associated protein 3

Target/Specificity

ApoA5

Antibody Form

Liquid

Appearance

Colorless liquid

Formulation

100 µl of antibody in PBS with 0.09% (W/V) sodium azide

Handling

The antibody solution should be gently mixed before use.

Reconstitution & Storage

-20 °C

Background Descriptions**Precautions**

ApoA5 Antibody (NT) is for research use only and not for use in diagnostic or therapeutic procedures.

ApoA5 Antibody (NT) - Protein Information

Name APOA5

Synonyms RAP3

Function

Minor apolipoprotein mainly associated with HDL and to a lesser extent with VLDL. May also be associated with chylomicrons. Important determinant of plasma triglyceride (TG) levels by both being a potent stimulator of apo-CII lipoprotein lipase (LPL) TG hydrolysis and an inhibitor of the hepatic VLDL-TG production rate (without affecting the VLDL-apoB production rate) (By similarity). Activates poorly lecithin:cholesterol acyltransferase (LCAT) and does not enhance efflux of cholesterol from macrophages. Binds heparin (PubMed:17326667).

Cellular Location

Secreted. Early endosome. Late endosome. Golgi apparatus, trans-Golgi network. Note=In the presence of SORL1, internalized to early endosomes, sorted in a retrograde fashion to late endosomes, from which a portion is sent to lysosomes and degradation, another portion is sorted to the trans-Golgi network

Tissue Location

Liver and plasma.

ApoA5 Antibody (NT) - Protocols

Provided below are standard protocols that you may find useful for product applications.

ApoA5 Antibody (NT) - Background

Apolipoproteins are plasma lipoproteins that function as transporters of lipids and cholesterol in the circulatory system. The protein encoded by this gene is an apolipoprotein that plays an important role in regulating the plasma triglyceride levels, a major risk factor for coronary artery disease. It is a component of high density lipoprotein and is highly similar to a rat protein that is upregulated in response to liver injury. Mutations in this gene have been associated with hypertriglyceridemia and hyperlipoproteinemia type 5.
