

MBD1 polyclonal antibody Rabbit Polyclonal Antibody

Catalog # ABV11363

Specification

MBD1 polyclonal antibody - Product Information

Application	WB, E
Primary Accession	<u>Q9UIS9</u>
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	66607

MBD1 polyclonal antibody - Additional Information

Gene ID 4152

Positive Control

Application & Usage

Western blot: Hela cells, ELISA: peptides, ChIP: U2OS cells. ChIP: 1.5 µg/ChIP, WB: 1:500, ELISA: 1:1000.

Other Names CXXC3, PCM1, RFT, Methyl-CpG-Binding Domain 1

Target/Specificity MBD1

Antibody Form Liquid

Appearance Colorless liquid

Formulation In PBS with 0.05% sodium azide and 0.05% ProClin 300.

Handling The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

MBD1 polyclonal antibody is for research use only and not for use in diagnostic or therapeutic procedures.

MBD1 polyclonal antibody - Protein Information

Name MBD1 (HGNC:6916)

Synonyms CXXC3, PCM1

Function

Transcriptional repressor that binds CpG islands in promoters where the DNA is methylated at position 5 of cytosine within CpG dinucleotides. Binding is abolished by the presence of 7-mG that is produced by DNA damage by methylmethanesulfonate (MMS). Acts as transcriptional repressor and plays a role in gene silencing by recruiting ATF7IP, which in turn recruits factors such as the histone methyltransferase SETDB1. Probably forms a complex with SETDB1 and ATF7IP that represses transcription and couples DNA methylation and histone 'Lys-9' trimethylation. Isoform 1 and isoform 2 can also repress transcription from unmethylated promoters.

Cellular Location

Nucleus. Nucleus matrix. Nucleus speckle Chromosome Note=Nuclear, in a punctate pattern (PubMed:12711603). Associated with euchromatic regions of the chromosomes, with pericentromeric regions on chromosome 1 and with telomeric regions from several chromosomes (PubMed:10648624, PubMed:10454587).

Tissue Location Widely expressed..

MBD1 polyclonal antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

MBD1 polyclonal antibody - Background

MBD1 is a transcriptional repressor that specifically binds to methylated CpG dinucleotides in promoter sequences. MBD1 acts by recruiting a variety of histone deacetylases (HDAC's) and chromatin remodelling factors. MBD1-dependent transcriptional repression is mediated by ATF7IP through the recruitment of factors such as the histone methyltransferase SETDB1. MBD1 probably forms a complex with SETDB1 and ATF7IP which couples DNA methylation to H3K9 trimethylation and represses transcription.
