

Annexin VIII Antibody
Purified Rabbit Polyclonal Antibody
Catalog # ABV11549**Specification**

Annexin VIII Antibody - Product Information

Application	WB
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

Annexin VIII Antibody - Additional Information**Other Names**

Annexin A8 antibody, Annexin VIII antibody, Annexin-8 antibody, ANX8 antibody, Anxa8 antibody, ANXA8 human antibody, VAC beta antibody, VAC-beta antibody, Vascular anticoagulant beta antibody, Vascular anticoagulant-beta antibody.

Target/Specificity

Annexin VIII

Formulation

100 µg (0.5 mg/ml) purified goat anti-Annexin VIII polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA, 0.02% sodium azide.

Handling

The antibody solution should be gently mixed before use.

Background Descriptions**Precautions**

Annexin VIII Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Annexin VIII Antibody - Protein Information**Annexin VIII Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

Annexin VIII Antibody - Images**Annexin VIII Antibody - Background**

The annexin family of calcium-binding proteins is composed of at least ten mammalian genes. It is characterized by a conserved core domain which binds to phospholipids in a Ca^{2+} -dependent manner. Its unique amino terminal region may confer the binding specificity. Annexin family members have been implicated as regulators of diverse processes as ion flux, endocytosis and exocytosis, and cellular adhesion. Annexin VIII is preferentially expressed in acute promyelocytic leukemia (APL) cells which may relate its role in hematopoietic cell differentiation.
