

LAMP-1 Antibody (Center) Purified Rabbit Polyclonal Antibody Catalog # ABV11572

#### **Specification**

# LAMP-1 Antibody (Center) - Product Information

Application Primary Accession Reactivity Host Clonality Isotype Calculated MW WB, IF <u>P11279</u> Human, Mouse, Rat Rabbit Polyclonal Rabbit IgG 44882

#### LAMP-1 Antibody (Center) - Additional Information

Gene ID 3916

Other Names LAMP-1, Lysosome associated membrane protein 1

Target/Specificity LAMP-1

**Formulation** 100 μg (1 mg/ml) in 1X PBS containing 0.02% sodium azide.

Handling The antibody solution should be gently mixed before use.

**Background Descriptions** 

**Precautions** LAMP-1 Antibody (Center) is for research use only and not for use in diagnostic or therapeutic procedures.

# LAMP-1 Antibody (Center) - Protein Information

Name LAMP1 {ECO:0000303|PubMed:23632890, ECO:0000312|HGNC:HGNC:6499}

Function

Lysosomal membrane glycoprotein which plays an important role in lysosome biogenesis, lysosomal pH regulation, autophagy and cholesterol homeostasis (PubMed:<a href="http://www.uniprot.org/citations/37390818" target="\_blank">37390818</a>). Acts as an important regulator of lysosomal lumen pH regulation by acting as a direct inhibitor of the proton channel TMEM175, facilitating lysosomal acidification for optimal hydrolase activity (PubMed:<a href="http://www.uniprot.org/citations/37390818" target="\_blank">37390818</a>). Also plays an

important role in NK-cells cytotoxicity (PubMed: <a

href="http://www.uniprot.org/citations/2022921" target="\_blank">2022921</a>, PubMed:<a href="http://www.uniprot.org/citations/23632890" target="\_blank">23632890</a>). Mechanistically, participates in cytotoxic granule movement to the cell surface and perforin trafficking to the lytic granule (PubMed:<a href="http://www.uniprot.org/citations/23632890" target="\_blank">23632890</a>). Mechanistically, participates in cytotoxic granule movement to the cell surface and perforin trafficking to the lytic granule (PubMed:<a href="http://www.uniprot.org/citations/23632890" target="\_blank">23632890</a>). In addition, protects NK-cells from degranulation-associated damage induced by their own cytotoxic granule content (PubMed:<a href="http://www.uniprot.org/citations/23847195" target="\_blank">23847195</a>). Presents

href="http://www.uniprot.org/citations/2384/195" target="\_blank">2384/195</a>). Presents carbohydrate ligands to selectins (PubMed:<a href="http://www.uniprot.org/citations/7685349" target="\_blank">7685349</a>).

**Cellular Location** 

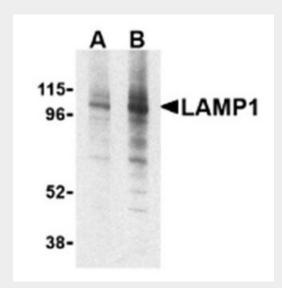

Lysosome membrane; Single-pass type I membrane protein. Endosome membrane; Single-pass type I membrane protein. Late endosome membrane; Single-pass type I membrane protein. Cell membrane; Single-pass type I membrane protein. Cytolytic granule membrane; Single-pass type I membrane protein. Note=This protein shuttles between lysosomes, endosomes, and the plasma membrane (By similarity). Colocalizes with OSBPL1A at the late endosome (PubMed:16176980). {ECO:0000250|UniProtKB:P05300, ECO:0000269|PubMed:16176980, ECO:0000269|PubMed:17897319}

# LAMP-1 Antibody (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

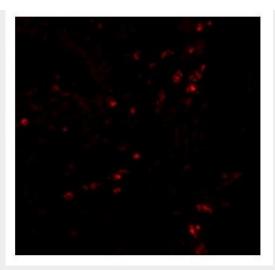

- <u>Western Blot</u>
- Blocking Peptides
- <u>Dot Blot</u>
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

#### LAMP-1 Antibody (Center) - Images

Western blot analysis of LAMP-1 in EL4 cell lysate with LAMP-1 antibody at A(lug/ml) and B(2ug/ml).

Immunofluorescence of LAMP-1 in human colon tissue with LAMP-1 antibody at 20ug/ml.

# LAMP-1 Antibody (Center) - Background

Autophagy, the process of bulk degradation of cellular proteins thro µgh an autophagosomic-lysosomal pathway is important for normal growth control and may be defective in tumor cells. It is involved in the preservation of cellular nutrients under starvation conditions as well as the normal turnover of cytosolic components and is negatively regulated by TOR (Target of rapamycin). A protein recently found to be involved in autophagy, LAMP-2, is a highly glycosylated protein associated with the lysosome. LAMP-1 shares much homology to LAMP-2 and is tho µght to have overlapping functions. Mice lacking LAMP-1 had very minor defects compared to those deficient in LAMP-2 expression. However, the loss of both proteins resulted in embryonic lethality, s µggesting that each protein possesses some unique and necessary functions.
