

Lymphotactin Antibody

Purified Rabbit Polyclonal Antibody Catalog # ABV11595

Specification

Lymphotactin Antibody - Product Information

Application WB **Primary Accession** P47993 NP 032536 Other Accession Reactivity Mouse Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 12467

Lymphotactin Antibody - Additional Information

Gene ID 16963

Other Names

C motif chemokine 1, Cytokine SCM-1, Small-inducible cytokine C1

Target/Specificity

Lymphotactin

Formulation

 $100 \mu g$ (0.5 mg/ml) Protein A purified rabbit anti-mouse Lymphotactin polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 50% glycerol, 1% BSA, 0.02% thimerosal.

Handling

The antibody solution should be gently mixed before use.

Background Descriptions

Precautions

Lymphotactin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Lymphotactin Antibody - Protein Information

Name Xcl1

Synonyms Lptn, Ltn, Scyc1

Function

Chemotactic activity for lymphocytes but not for monocytes or neutrophils. In thymus, mediates medullary accumulation of thymic dendritic cells and contributes to regulatoy T cell development,

playing a role in self-tolerance establishment.

Cellular Location Secreted.

Tissue Location

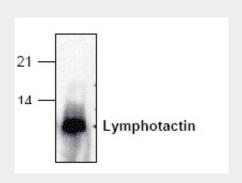

Expressed in activated CD8(+) T cells. In the thymus, expressed by medullary thymic epithelial cells

Lymphotactin Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Lymphotactin Antibody - Images

Western blot analysis of mouse lymphotactin exprission in transfected cells.

Lymphotactin Antibody - Background

Lymphotactin is the only C chemokine so far identified which has a single cysteine residue near the amino terminus. It has 114 amino acids with a 22 amino acids signal peptide. It is produced in activated CD8+ T cells and NK cells. Lymphotactin attracts both T lymphocytes and NK cells.
