

Anti-human CD41 antibody

Purified Mouse Monoclonal Antibody Catalog # ABV11682

Specification

Anti-human CD41 antibody - Product Information

Application E, FC
Reactivity Human
Host Mouse
Clonality Monoclonal
Isotype Mouse IgG1

Anti-human CD41 antibody - Additional Information

Other Names

Integrin alpha chain-2b, ITGA2B

Target/Specificity

CD41 (unconjugated)

Formulation

1 mg/ml in phosphate buffered saline (PBS) with sodium azide (15 mM), Approx. pH: 7.4.

Handling

The antibody solution should be gently mixed before use

Background Descriptions

Precautions

Anti-human CD41 antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-human CD41 antibody - Protein Information

Anti-human CD41 antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety

• Cell Culture

Anti-human CD41 antibody - Images

Detection of CD41 by Elisa. PEP-30: 30ug of purified exosomes from human healthy donor's plasma. MM1-30: 30ug of purified exosomes from MM1 cell supernatant. COLO1-30: 30ug of purified exosomes fromCOLO1 cell supernatant.

CD41 staining of human plasma purified exosomes.

Anti-human CD41 antibody - Background

Integrin alpha chain 2b, also known as CD41, is a heterodimeric integral membrane protein. It undergoes post-translational modifications that result in two polypeptide chains linked by a disulfide bond. CD41 is expressed on platelets and megakaryocytes, but also on early embryonic hematopoietic stem cells and related exosomes.
