

Anti- Histone H3.3 Rabbit Monoclonal Antibody Rabbit Monoclonal Antibody Catalog # ABV11834

Specification

Anti- Histone H3.3 Rabbit Monoclonal Antibody - Product Information

Application Primary Accession Reactivity Host Clonality Isotype Calculated MW WB, E <u>P84243</u> Human Rabbit Monoclonal Rabbit IgG 15328

Anti- Histone H3.3 Rabbit Monoclonal Antibody - Additional Information

Gene ID 3020;3021

Positive Control Application & Usage WB: Hela cell lysate Western Blot: 0.5 ug/mL - 2 ug/mL; ELISA: 0.2 ug/mL - 1 ug/mL; Multiplex: 0.05 ug/mL - 0.5 ug/mL. H3F3A

Alias Symbol **Other Names** H3F3A, H3.3A, H3F3, H3F3B, H3.3B

Appearance Colorless liquid

Formulation In 50% Glycerol/PBS with 1% BSA and 0.09% sodium azide

Reconstitution & Storage -20 °C

Background Descriptions

Precautions Anti- Histone H3.3 Rabbit Monoclonal Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti- Histone H3.3 Rabbit Monoclonal Antibody - Protein Information

Name H3-3A (<u>HGNC:4764</u>)

Synonyms H3.3A, H3F3, H3F3A

Function

Variant histone H3 which replaces conventional H3 in a wide range of nucleosomes in active genes. Constitutes the predominant form of histone H3 in non-dividing cells and is incorporated into chromatin independently of DNA synthesis. Deposited at sites of nucleosomal displacement throughout transcribed genes, suggesting that it represents an epigenetic imprint of transcriptionally active chromatin. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling.

Cellular Location Nucleus. Chromosome

Anti- Histone H3.3 Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
