

Goat Anti-DEAD-box protein 6 Antibody
Peptide-affinity purified goat antibody
Catalog # AF1312a**Specification**

Goat Anti-DEAD-box protein 6 Antibody - Product Information

Application	WB
Primary Accession	P26196
Other Accession	NP_004388 , 1656
Reactivity	Human
Predicted	Mouse, Rat, Dog
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	54417

Goat Anti-DEAD-box protein 6 Antibody - Additional Information**Gene ID** 1656**Other Names**

Probable ATP-dependent RNA helicase DDX6, 3.6.4.13, ATP-dependent RNA helicase p54, DEAD box protein 6, Oncogene RCK, DDX6, HLR2, RCK

Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-DEAD-box protein 6 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-DEAD-box protein 6 Antibody - Protein Information**Name** DDX6**Synonyms** HLR2, RCK**Function**

Essential for the formation of P-bodies, cytosolic membrane- less ribonucleoprotein granules involved in RNA metabolism through the coordinated storage of mRNAs encoding regulatory functions (PubMed: <a href="http://www.uniprot.org/citations/25995375"

target="_blank">25995375, PubMed:27342281, PubMed:31422817). Plays a role in P- bodies to coordinate the storage of translationally inactive mRNAs in the cytoplasm and prevent their degradation (PubMed:27342281). In the process of mRNA degradation, plays a role in mRNA decapping (PubMed:16364915). Blocks autophagy in nutrient-rich conditions by repressing the expression of ATG-related genes through degradation of their transcripts (PubMed:26098573).

Cellular Location

Cytoplasm, P-body. Cytoplasm. Nucleus. Note=Imported in the nucleus via interaction with EIF4ENIF1/4E-T via a piggy-back mechanism (PubMed:28216671). Upon cellular stress, relocates to stress granules (PubMed:26184334).

Tissue Location

Abundantly expressed in most tissues.

Goat Anti-DEAD-box protein 6 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Goat Anti-DEAD-box protein 6 Antibody - Images

AF1312a (0.3µg/ml) staining of Daudi (A), Jurkat (B) and HepG2 (C) lysates (35µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence

Goat Anti-DEAD-box protein 6 Antibody - Background

This gene encodes a member of the DEAD box protein family. The protein is an RNA helicase found in P-bodies and stress granules, and functions in translation suppression and mRNA degradation. It is required for microRNA-induced gene silencing.
