

Goat Anti-Galanin Receptor 3 Antibody
Peptide-affinity purified goat antibody
Catalog # AF1460a**Specification**

Goat Anti-Galanin Receptor 3 Antibody - Product Information

Application	IHC, WB
Primary Accession	O60755
Other Accession	NP_003605 , 8484
Reactivity	Human
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	39573

Goat Anti-Galanin Receptor 3 Antibody - Additional Information**Gene ID** 8484**Other Names**

Galanin receptor type 3, GAL3-R, GALR-3, GALR3, GALNR3

Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-Galanin Receptor 3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-Galanin Receptor 3 Antibody - Protein Information**Name** GALR3**Synonyms** GALNR3**Function**

Receptor for the hormone galanin (PubMed:25691535). Receptor for the hormone spexin-1 (PubMed:24517231).

Cellular Location

Cell membrane; Multi-pass membrane protein.

Goat Anti-Galanin Receptor 3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

Goat Anti-Galanin Receptor 3 Antibody - Images

AF1460a (3.8 µg/ml) staining of paraffin embedded Human Testis. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

AF1460a (2 µg/ml) staining of Human Skin lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

Goat Anti-Galanin Receptor 3 Antibody - Background

The neuropeptide galanin modulates a variety of physiologic processes including cognition/memory, sensory/pain processing, hormone secretion, and feeding behavior. The human galanin receptors are G protein-coupled receptors that functionally couple to their intracellular

effector through distinct signaling pathways. GALR3 is found in many tissues and may be expressed as 1.4-, 2.4-, and 5-kb transcripts
