

#### **Goat Anti-GATA1 Antibody**

Peptide-affinity purified goat antibody Catalog # AF1465a

## **Specification**

## **Goat Anti-GATA1 Antibody - Product Information**

Application WB
Primary Accession P15976

Other Accession <u>NP\_002040</u>, <u>2623</u>

Reactivity Human

Predicted Mouse, Rat, Dog, Cow

Host Goat
Clonality Polyclonal
Concentration 100ug/200ul

Isotype IgG
Calculated MW 42751

# **Goat Anti-GATA1 Antibody - Additional Information**

#### **Gene ID 2623**

## **Other Names**

Erythroid transcription factor, Eryf1, GATA-binding factor 1, GATA-1, GF-1, NF-E1 DNA-binding protein, GATA1, ERYF1, GF1

#### **Format**

0.5~mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

#### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

Goat Anti-GATA1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## **Goat Anti-GATA1 Antibody - Protein Information**

#### Name GATA1

Synonyms ERYF1, GF1

# **Function**

Transcriptional activator or repressor which serves as a general switch factor for erythroid development (PubMed:<a href="http://www.uniprot.org/citations/35030251" target="\_blank">35030251</a>). It binds to DNA sites with the consensus sequence

5'-[AT]GATA[AG]-3' within regulatory regions of globin genes and of other genes expressed in erythroid cells. Activates the transcription of genes involved in erythroid differentiation of K562 erythroleukemia cells, including HBB, HBG1/2, ALAS2 and HMBS (PubMed:<a href="http://www.uniprot.org/citations/24245781" target=" blank">24245781</a>).

**Cellular Location** Nucleus.

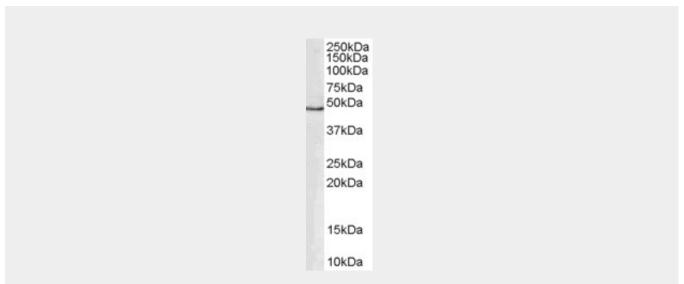

**Tissue Location** Erythrocytes..

# **Goat Anti-GATA1 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# Goat Anti-GATA1 Antibody - Images

AF1465a (0.3  $\mu$ g/ml) staining of human PBMC lysate (35  $\mu$ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

## Goat Anti-GATA1 Antibody - Background

This gene encodes a protein which belongs to the GATA family of transcription factors. The protein plays an important role in erythroid development by regulating the switch of fetal hemoglobin to adult hemoglobin. Mutations in this gene have been associated with X-linked dyserythropoietic anemia and thrombocytopenia.
