Goat Anti-IFT88 / Polaris Antibody - Protein Information**Name** IFT88**Synonyms** TG737, TTC10**Function**

Positively regulates primary cilium biogenesis (PubMed:17604723). Also involved in autophagy since it is required for trafficking of ATG16L and the expansion of the autophagic

compartment.

Goat Anti-IFT88 / Polaris Antibody - Background

This gene encodes a member of the tetratricopeptide repeat (TPR) family. Mutations of a similar gene in mouse can cause polycystic kidney disease. Two transcript variants encoding distinct isoforms have been identified for this gene.
