

# **Goat Anti-Triosephosphate isomerase Antibody**

Peptide-affinity purified goat antibody Catalog # AF2113a

### **Specification**

### Goat Anti-Triosephosphate isomerase Antibody - Product Information

Application WB, IHC Primary Accession P60174

Other Accession
Reactivity
Predicted
Rat, Dog, Cow

Host Goat
Clonality Polyclonal
Concentration 0.5mg/ml
Isotype IgG
Calculated MW 26669

## Goat Anti-Triosephosphate isomerase Antibody - Additional Information

#### **Gene ID 7167**

#### **Other Names**

Triosephosphate isomerase, TIM, 5.3.1.1, Triose-phosphate isomerase, TPI1, TPI

#### **Format**

0.5 mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### **Precautions**

Goat Anti-Triosephosphate isomerase Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### Goat Anti-Triosephosphate isomerase Antibody - Protein Information

#### Name TPI1

### Synonyms TPI

#### **Function**

Triosephosphate isomerase is an extremely efficient metabolic enzyme that catalyzes the interconversion between dihydroxyacetone phosphate (DHAP) and D-glyceraldehyde-3-phosphate (G3P) in glycolysis and gluconeogenesis.

**Cellular Location**Cytoplasm {ECO:0000255|PROSITE-ProRule:PRU10127}.

### Goat Anti-Triosephosphate isomerase Antibody - Protocols

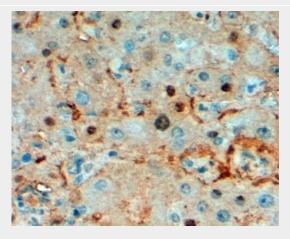

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## Goat Anti-Triosephosphate isomerase Antibody - Images

AF2113a staining (0.003  $\mu$ g/ml) of human liver lysate (RIPA buffer, 30  $\mu$ g total protein per lane). Primary incubated for 1 hour. Detected by western blot using chemiluminescence.

AF2113a (2  $\mu$ g/ml) staining of paraffin embedded Human Liver Steamed antigen retrieval with Tris/EDTA buffer pH 9, HRP-staining.

Goat Anti-Triosephosphate isomerase Antibody - Background

This gene encodes an enzyme, consisting of two identical proteins, which catalyzes the isomerization of glyceraldehydes 3-phosphate (G3P) and dihydroxy-acetone phosphate (DHAP) in glycolysis and gluconeogenesis. Mutations in this gene are associated with triosephosphate isomerase deficiency. Pseudogenes have been identified on chromosomes 1, 4, 6 and 7. Alternative splicing results in multiple transcript variants.
