

**CD45RB Antibody [Clone BRA-11; same as BRA-11G]**  
**Purified Mouse Monoclonal Antibody**  
**Catalog # AH10088****Specification**

---

**CD45RB Antibody [Clone BRA-11; same as BRA-11G] - Product Information**

Application	FC
Primary Accession	<a href="#">P08575</a>
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1, kappa
Calculated MW	180-220kDa KDa

**CD45RB Antibody [Clone BRA-11; same as BRA-11G] - Additional Information****Gene ID** 5788**Other Names**

Receptor-type tyrosine-protein phosphatase C, Leukocyte common antigen, L-CA, T200, CD45, PTPRC, CD45

**Target/Specificity**

Non-T, non-B CALLA positive ALL cell line REH (Leucocyte Workshop IV and V)

**Format**

0.5 ml at 100ug/ml; Conjugated to PE

**Storage**

Store at 2 to 8°C. Antibody is stable for 24 months.

**Precautions**

CD45RB Antibody [Clone BRA-11; same as BRA-11G] is for research use only and not for use in diagnostic or therapeutic procedures.

**CD45RB Antibody [Clone BRA-11; same as BRA-11G] - Protein Information****Name** PTPRC ([HGNC:9666](#))**Synonyms** CD45**Function**

Protein tyrosine-protein phosphatase required for T-cell activation through the antigen receptor. Acts as a positive regulator of T-cell coactivation upon binding to DPP4. The first PTPase domain has enzymatic activity, while the second one seems to affect the substrate specificity of the first one. Upon T-cell activation, recruits and dephosphorylates SKAP1 and FYN. Dephosphorylates LYN, and thereby modulates LYN activity (By similarity).

**Cellular Location**

Cell membrane; Single-pass type I membrane protein. Membrane raft Note=Colocalized with DPP4 in membrane rafts

**Tissue Location**

Isoform 1: Detected in thymocytes. Isoform 2: Detected in thymocytes. Isoform 3: Detected in thymocytes. Isoform 4: Not detected in thymocytes. Isoform 5: Detected in thymocytes. Isoform 6: Not detected in thymocytes. Isoform 7: Detected in thymocytes Isoform 8: Not detected in thymocytes.

**CD45RB Antibody [Clone BRA-11; same as BRA-11G] - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

**CD45RB Antibody [Clone BRA-11; same as BRA-11G] - Images**

Formalin-fixed, paraffin-embedded human tonsil stained with CD45RB Ab (BRA-11).

**CD45RB Antibody [Clone BRA-11; same as BRA-11G] - Background**

CD45R, also designated CD45 and PTPRC, has been identified as a transmembrane glycoprotein, broadly expressed among hematopoietic cells. Multiple isoforms of CD45R are distributed throughout the immune system according to cell type. These isoforms arise because of alternative splicing of exons 4, 5, and 6. The corresponding protein domains are characterized by the binding of monoclonal antibodies specific for CD45RA (exon 4), CD45RB (exon 5), CD45RC (exon 6) and CD45RO (exons 4 to 6 spliced out). The variation in these isoforms is localized to the extracellular domain of CD45R, while the intracellular domain is conserved. CD45R functions as a phosphor-tyrosine phosphatase. Antibody to CD45 is useful in differential diagnosis of lymphoid tumors from non-hematopoietic undifferentiated neoplasms.
