

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide

Mouse Monoclonal Antibody [Clone 2.52]
Catalog # AH11499

Specification

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide - Product Information

Application ,3,4,
Primary Accession P01562

Other Accession 3439, 37026, 533471

Reactivity Human
Host Mouse
Clonality Monoclonal

Isotype Mouse / IgG1, kappa

Calculated MW 16-27kDa KDa

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide - Additional Information

Gene ID 3439;3447

Other Names

Interferon alpha-1/13, IFN-alpha-1/13, Interferon alpha-D, LeIF D, IFNA1

Storage

Store at 2 to 8°C. Antibody is stable for 24 months.

Precautions

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide is for research use only and not for use in diagnostic or therapeutic procedures.

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide - Protein Information

Name IFNA1

Function

Produced by macrophages, IFN-alpha have antiviral activities. Interferon stimulates the production of two enzymes: a protein kinase and an oligoadenylate synthetase.

Cellular Location

Secreted.

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides

Tel: 858.875.1900 Fax: 858.875.1999

- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Interferon alpha-1 (IFNA1) Antibody - With BSA and Azide - Background

This MAb is specific for human interferon alpha 1 and does not cross react with human interferon alpha 2. Interferons are widely used therapeutic agents because of their anti-tumor and anti-viral effects and because of their modulatory effects on the immune system. These cytokines produce their effects by binding to the Type 1 Interferon- & Receptor (IFNAR1). Down regulation of this receptor plays a key role in determining the magnitude and duration of cytokine signaling. This down regulation is influenced by phosphorylation of Serine 535 and 539 in the IFNAR1.
