

PHF21A antibody - middle region

Rabbit Polyclonal Antibody Catalog # Al10137

Specification

PHF21A antibody - middle region - Product Information

Application WB
Primary Accession Q96BD5

Other Accession

Q96BD5-2, NP_057705, NM_016621

Reactivity

Human, Rat, Rabbit, Dog, Guinea Pig,

Horse, Bovine

Predicted Rat, Pig, Dog, Guinea Pig, Horse, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 70 kDa KDa

PHF21A antibody - middle region - Additional Information

Gene ID 51317

Alias Symbol BHC80, BM-006, KIAA1696

Other Names

PHD finger protein 21A, BHC80a, BRAF35-HDAC complex protein BHC80, PHF21A, BHC80, KIAA1696

Target/Specificity

PHF21A (BHC80) is a component of a BRAF35/histone deacetylase complex (BHC) that mediates repression of neuron-specific genes through the cis-regulatory element known as repressor element-1 (RE1) or neural restrictive silencer (NRS).BHC80 is a component of a BRAF35 (MIM 605535)/histone deacetylase (HDAC, see MIM 601241) complex (BHC) that mediates repression of neuron-specific genes through the cis-regulatory element known as repressor element-1 (RE1) or neural restrictive silencer (NRS) (Hakimi et al., 2002 [PubMed 12032298]).[supplied by OMIM].

Format

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

Reconstitution & Storage

Add 50 ul of distilled water. Final anti-PHF21A antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at -20°C. Avoid repeat freeze-thaw cycles.

Precautions

PHF21A antibody - middle region is for research use only and not for use in diagnostic or therapeutic procedures.

PHF21A antibody - middle region - Protein Information

Name PHF21A

Synonyms BHC80, KIAA1696

Function

Component of the BHC complex, a corepressor complex that represses transcription of neuron-specific genes in non-neuronal cells. The BHC complex is recruited at RE1/NRSE sites by REST and acts by deacetylating and demethylating specific sites on histones, thereby acting as a chromatin modifier. In the BHC complex, it may act as a scaffold. Inhibits KDM1A-mediated demethylation of 'Lys-4' of histone H3 in vitro, suggesting a role in demethylation regulation.

Cellular Location

Nucleus.

Tissue Location

Highly expressed in brain (PubMed:31649809). Expressed at lower level in other tissues, including heart, kidney, liver, lung and skeletal muscle (PubMed:31649809). Abundantly expressed in fetal brain (PubMed:31649809).

PHF21A antibody - middle region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

PHF21A antibody - middle region - Images

PHF21A antibody - middle region (Al10137) in Human Jurkat cells using Western Blot WB Suggested Anti-PHF21A Antibody Titration: 0.2-1 µg/ml

ELISA Titer: 1:1562500

Positive Control: Jurkat cell lysate

PHF21A antibody - middle region - Background

This is a rabbit polyclonal antibody against PHF21A. It was validated on Western Blot using a cell lysate as a positive control. Abgent strives to provide antibodies covering each member of a whole protein family of your interest. We also use our best efforts to provide you antibodies recognize

various epitopes of a target protein. For availability of antibody needed for your experiment, please inquire (sales@abgent.com).
