Cacng3 antibody - C-terminal region - Protein Information**Name** Cacng3**Function**

Regulates the trafficking to the somatodendritic compartment and gating properties of AMPA-selective glutamate receptors (AMPA) (PubMed:18341993). Promotes their targeting to the cell membrane and synapses and modulates their gating properties by slowing their rates of activation, deactivation and desensitization. Does not show subunit-specific AMPA receptor regulation and regulates all AMPAR subunits. Thought to stabilize the calcium channel in an inactivated (closed) state (By similarity).

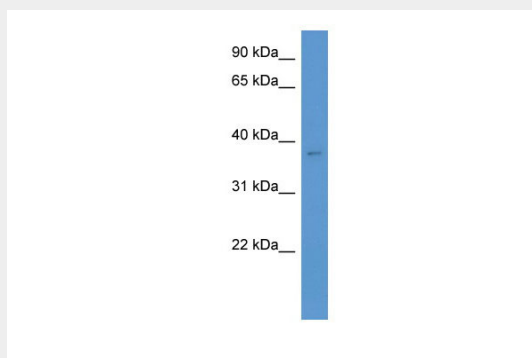

Cellular Location

Membrane; Multi-pass membrane protein. Note=Displays a somatodendritic localization and is excluded from axons in neurons.
