

# Men1 antibody - middle region

Rabbit Polyclonal Antibody Catalog # Al11067

### **Specification**

## Men1 antibody - middle region - Product Information

Application WB
Primary Accession 088559

Other Accession <u>NM 008583, NP 032609</u>

Reactivity Human, Mouse, Rat, Pig, Horse, Bovine

Predicted Human, Mouse, Rat, Pig

Host Rabbit
Clonality Polyclonal
Calculated MW 67kDa KDa

### Men1 antibody - middle region - Additional Information

**Gene ID 17283** 

Alias Symbol AW045611

Other Names Menin, Men1

#### **Format**

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

#### **Reconstitution & Storage**

Add 50 ul of distilled water. Final anti-Men1 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

### **Precautions**

Men1 antibody - middle region is for research use only and not for use in diagnostic or therapeutic procedures.

## Men1 antibody - middle region - Protein Information

## Name Men1

### **Function**

Essential component of a MLL/SET1 histone methyltransferase (HMT) complex, a complex that specifically methylates 'Lys-4' of histone H3 (H3K4). Functions as a transcriptional regulator. Binds to the TERT promoter and represses telomerase expression. Plays a role in TGFB1-mediated inhibition of cell-proliferation, possibly regulating SMAD3 transcriptional activity. Represses JUND-mediated transcriptional activation on AP1 sites, as well as that mediated by NFKB subunit RELA. Positively regulates HOXC8 and HOXC6 gene expression (By similarity). May be involved in normal hematopoiesis through the activation of HOXA9 expression. May be involved in DNA repair.

## **Cellular Location**

Nucleus. Note=May be perinuclear in testis.

### **Tissue Location**

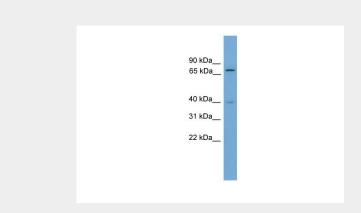

Widely expressed, with high levels in hippocampus, cerebral cortex, testis and thymus (at protein level). Also expressed at high levels in pancreatic islets, ovary and bone marrow. In the brain, highest expression in hippocampus pyramidal nerve cells (at protein level). In the testis, may be expressed in spermatogonia (at protein level). Low expression, if any, in skeletal muscle

## Men1 antibody - middle region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## Men1 antibody - middle region - Images

WB Suggested Anti-Men1 Antibody Titration: 0.2-1 µg/ml

Positive Control: Mouse Muscle
