#### **Eomes antibody - C-terminal region - Protein Information**

Name Eomes

Synonyms Tbr2

#### Function

Functions as a transcriptional activator playing a crucial role during development. Functions in trophoblast differentiation and later in gastrulation, regulating both mesoderm delamination and endoderm specification. Plays a role in brain development being required for the specification and the proliferation of the intermediate progenitor cells and their progeny in the cerebral cortex. Also involved in the differentiation of CD8+ T-cells during immune response regulating the expression of lytic effector genes.

**Cellular Location** Nucleus.

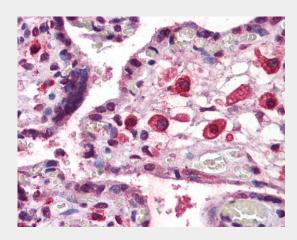

**Tissue Location** Expressed in CD8+ T-cells.
