

## Fto antibody - N-terminal region

Rabbit Polyclonal Antibody Catalog # Al12799

# **Specification**

## Fto antibody - N-terminal region - Product Information

Application WB

Primary Accession <u>Q8BGW1</u>

Other Accession <u>NM\_011936</u>, <u>NP\_036066</u>

Reactivity Human, Mouse, Rat, Rabbit, Pig, Sheep,

Horse, Yeast, Bovine, Dog

Predicted Human, Mouse, Rat, Rabbit, Pig, Sheep,

Horse, Bovine

Host Rabbit
Clonality Polyclonal
Calculated MW 58kDa KDa

# Fto antibody - N-terminal region - Additional Information

**Gene ID 26383** 

Alias Symbol AW743446, mKIAA1752

**Other Names** 

Alpha-ketoglutarate-dependent dioxygenase FTO, 1.14.11.-, Fat mass and obesity-associated protein, Protein fatso, Fto, Kiaa1752

#### **Format**

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

#### **Reconstitution & Storage**

Add 50 ul of distilled water. Final anti-Fto antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

## **Precautions**

Fto antibody - N-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

## Fto antibody - N-terminal region - Protein Information

Name Fto {ECO:0000303|PubMed:10501967, ECO:0000312|MGI:MGI:1347093}

#### **Function**

RNA demethylase that mediates oxidative demethylation of different RNA species, such as mRNAs, tRNAs and snRNAs, and acts as a regulator of fat mass, adipogenesis and energy homeostasis (PubMed:<a href="http://www.uniprot.org/citations/17991826" target="\_blank">17991826</a>, PubMed:<a href="http://www.uniprot.org/citations/18775698" target="\_blank">18775698</a>, PubMed:<a href="http://www.uniprot.org/citations/28002401" target="\_blank">28002401</a>). Specifically demethylates N(6)-methyladenosine (m6A) RNA, the most prevalent internal

modification of messenger RNA (mRNA) in higher eukaryotes (PubMed:<a href="http://www.uniprot.org/citations/28002401" target="\_blank">28002401</a>). M6A demethylation by FTO affects mRNA expression and stability (By similarity). Also able to demethylate m6A in U6 small nuclear RNA (snRNA) (By similarity). Mediates demethylation of N(6),2'- O-dimethyladenosine cap (m6A(m)), by demethylating the N(6)- methyladenosine at the second transcribed position of mRNAs and U6 snRNA (PubMed:<a

href="http://www.uniprot.org/citations/28002401" target="\_blank">28002401</a>). Demethylation of m6A(m) in the 5'-cap by FTO affects mRNA stability by promoting susceptibility to decapping (By similarity). Also acts as a tRNA demethylase by removing N(1)- methyladenine from various tRNAs (By similarity). Has no activity towards 1-methylguanine (By similarity). Has no detectable activity towards double-stranded DNA (By similarity). Also able to repair alkylated DNA and RNA by oxidative demethylation: demethylates single- stranded RNA containing 3-methyluracil, single-stranded DNA containing 3-methylthymine and has low demethylase activity towards single- stranded DNA containing 1-methyladenine or 3-methylcytosine (PubMed:<a href="http://www.uniprot.org/citations/17991826" target="\_blank">17991826</a>/a>, PubMed:<a href="http://www.uniprot.org/citations/18775698" target="\_blank">18775698</a>/a>). Ability to repair alkylated DNA and RNA is however unsure in vivo (PubMed:<a

href="http://www.uniprot.org/citations/17991826" target="\_blank">17991826</a>, PubMed:<a href="http://www.uniprot.org/citations/18775698" target="\_blank">18775698</a>). Involved in the regulation of fat mass, adipogenesis and body weight, thereby contributing to the regulation of body size and body fat accumulation (PubMed:<a

href="http://www.uniprot.org/citations/19234441" target="\_blank">19234441</a>, PubMed:<a href="http://www.uniprot.org/citations/19680540" target="\_blank">19680540</a>, PubMed:<a href="http://www.uniprot.org/citations/21076408" target="\_blank">21076408</a>, PubMed:<a href="http://www.uniprot.org/citations/23817550" target="\_blank">23817550</a>, PubMed:<a href="http://www.uniprot.org/citations/23300482" target="\_blank">23300482</a>). Involved in the regulation of thermogenesis and the control of adipocyte differentiation into brown or white fat cells (PubMed:<a href="http://www.uniprot.org/citations/19234441"

target="\_blank">19234441</a>, PubMed:<a href="http://www.uniprot.org/citations/19680540" target="\_blank">19680540</a>). Regulates activity of the dopaminergic midbrain circuitry via its ability to demethylate m6A in mRNAs (PubMed:<a

href="http://www.uniprot.org/citations/23817550" target="blank">23817550</a>).

# **Cellular Location**

Nucleus. Nucleus speckle {ECO:0000250|UniProtKB:Q9C0B1}. Cytoplasm {ECO:0000250|UniProtKB:Q9C0B1}. Note=Localizes mainly in the nucleus, where it is able to demethylate N(6)-methyladenosine (m6A) and N(6),2'- O-dimethyladenosine cap (m6A(m)) in U6 small nuclear RNA (snRNA), N(1)- methyladenine from tRNAs and internal m6A in mRNAs. In the cytoplasm, mediates demethylation of m6A and m6A(m) in mRNAs and N(1)- methyladenine from tRNAs. {ECO:0000250|UniProtKB:Q9C0B1}

# **Tissue Location**

Ubiquitous. Detected in brain, brain cortex, hypothalamus, cerebellum, liver, pancreas, heart, kidney, white adipose tissue and skeletal muscle. Most abundant in the brain, particularly in hypothalamic nuclei governing energy balance

#### Fto antibody - N-terminal region - Protocols

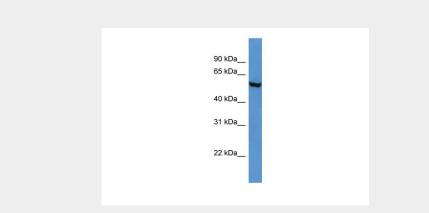

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence

- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
