

Psma2 Antibody - C-terminal region

Rabbit Polyclonal Antibody Catalog # Al13946

Specification

Psma2 Antibody - C-terminal region - Product Information

Application WB

Primary Accession P17220

Other Accession <u>NM_017279</u>, <u>NP_058975</u>

Reactivity Human, Mouse, Rat, Rabbit, Sheep, Horse,

Bovine, Guinea Pig, Dog

Predicted Human, Mouse, Rat, Rabbit, Pig, Sheep,

Horse, Bovine, Guinea Pig, Dog

Host Rabbit
Clonality Polyclonal
Calculated MW 25kDa KDa

Psma2 Antibody - C-terminal region - Additional Information

Gene ID 29669

Other Names

Proteasome subunit alpha type-2, 3.4.25.1, Macropain subunit C3, Multicatalytic endopeptidase complex subunit C3, Proteasome component C3, Psma2

Format

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

Reconstitution & Storage

Add 50 ul of distilled water. Final anti-Psma2 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

Precautions

Psma2 Antibody - C-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

Psma2 Antibody - C-terminal region - Protein Information

Name Psma2

Function

Component of the 20S core proteasome complex involved in the proteolytic degradation of most intracellular proteins. This complex plays numerous essential roles within the cell by associating with different regulatory particles. Associated with two 19S regulatory particles, forms the 26S proteasome and thus participates in the ATP- dependent degradation of ubiquitinated proteins. The 26S proteasome plays a key role in the maintenance of protein homeostasis by removing misfolded or damaged proteins that could impair cellular functions, and by removing proteins whose functions are no longer required. Associated with the PA200 or PA28, the 20S proteasome

mediates ubiquitin- independent protein degradation. This type of proteolysis is required in several pathways including spermatogenesis (20S-PA200 complex) or generation of a subset of MHC class I-presented antigenic peptides (20S-PA28 complex).

Cellular Location

Cytoplasm. Nucleus. Note=Translocated from the cytoplasm into the nucleus following interaction with AKIRIN2, which bridges the proteasome with the nuclear import receptor IPO9 (By similarity) Colocalizes with TRIM5 in cytoplasmic bodies (By similarity) {ECO:0000250|UniProtKB:P25787, ECO:0000250|UniProtKB:P49722}

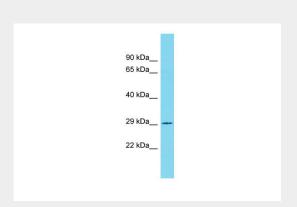

Tissue Location Ubiquitous..

Psma2 Antibody - C-terminal region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

Psma2 Antibody - C-terminal region - Images

Host: Rabbit

Target Name: Psma2

Sample Tissue: Rat Lung lysates Antibody Dilution: 1.0µg/ml
