

Ccnb1ip1 Antibody - N-terminal region Rabbit Polyclonal Antibody

Catalog # Al14293

# Specification

# **Ccnb1ip1 Antibody - N-terminal region - Product Information**

Application Primary Accession Other Accession Reactivity

Predicted

Host Clonality Calculated MW WB <u>D3Z3K2</u> <u>NM\_001111119</u>, <u>NP\_001104589</u> Human, Mouse, Rat, Rabbit, Pig, Horse, Bovine, Guinea Pig, Dog Human, Mouse, Rat, Rabbit, Pig, Horse, Bovine, Guinea Pig, Dog Rabbit Polyclonal 31kDa KDa

# Ccnb1ip1 Antibody - N-terminal region - Additional Information

Gene ID 239083

Alias Symbol Gm288, Hei10, mei4 Other Names E3 ubiquitin-protein ligase CCNB1IP1, 6.3.2.-, Cyclin-B1-interacting protein 1, Ccnb1ip1, Gm288, Hei10, Mei4

#### Format

Liquid. Purified antibody supplied in 1x PBS buffer with 0.09% (w/v) sodium azide and 2% sucrose.

### **Reconstitution & Storage**

Add 50 ul of distilled water. Final anti-Ccnb1ip1 antibody concentration is 1 mg/ml in PBS buffer with 2% sucrose. For longer periods of storage, store at 20°C. Avoid repeat freeze-thaw cycles.

**Precautions** Ccnblip1 Antibody - N-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

### Ccnb1ip1 Antibody - N-terminal region - Protein Information

Name Ccnb1ip1

Synonyms Gm288, Hei10, Mei4

### Function

Ubiquitin E3 ligase that acts as a limiting factor for crossing-over during meiosis: required during zygonema to limit the colocalization of RNF212 with MutS-gamma-associated recombination sites and thereby establish early differentiation of crossover and non- crossover sites. Later, it is directed by MutL-gamma to stably accumulate at designated crossover sites. Probably promotes

the dissociation of RNF212 and MutS-gamma to allow the progression of recombination and the implementation of the final steps of crossing over. Modulates cyclin-B levels and participates in the regulation of cell cycle progression through the G2 phase. Overexpression causes delayed entry into mitosis.

#### **Cellular Location**

Nucleus. Chromosome. Note=Associates to the synaptonemal complex

#### **Tissue Location**

Expressed predominantly in the testes and 17 day embryos (corresponding to prophase I in females). Weakly or not expressed in other tissues.

# Ccnb1ip1 Antibody - N-terminal region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
