THEMIS antibody - C-terminal region - Protein Information**Name** THEMIS**Synonyms** C6orf190, C6orf207**Function**

Plays a central role in late thymocyte development by controlling both positive and negative T-cell selection. Required to sustain and/or integrate signals required for proper lineage commitment and maturation of T-cells. Regulates T-cell development through T-cell antigen receptor (TCR) signaling and in particular through the regulation of calcium influx and phosphorylation of Erk.
