Polyclonal
53kDa KDa

## Ccdc47 Antibody-C-terminal region - Additional Information

Gene ID 67163

Alias Symbol
2610204L23Rik, C88307, RP23-81G14.10, asp4, calumin
Other Names
Coiled-coil domain-containing protein 47, Adipocyte-specific protein 4, Ccdc47, Asp4
Format
Liquid. Purified antibody supplied in $1 \times$ PBS buffer with $0.09 \%$ (w/v) sodium azide and $2 \%$ sucrose.
Reconstitution \& Storage
Add 50 ul of distilled water. Final anti-Ccdc47 antibody concentration is $1 \mathrm{mg} / \mathrm{ml}$ in PBS buffer with $2 \%$ sucrose. For longer periods of storage, store at $20^{\circ} \mathrm{C}$. Avoid repeat freeze-thaw cycles.

## Precautions

Ccdc47 Antibody - C-terminal region is for research use only and not for use in diagnostic or therapeutic procedures.

## Ccdc47 Antibody-C-terminal region - Protein Information

Name Ccdc47 \{ECO:0000312|MGI:MGI:1914413\}

## Function

Component of the multi-pass translocon (MPT) complex that mediates insertion of multi-pass membrane proteins into the lipid bilayer of membranes (By similarity). The MPT complex takes over after the SEC61 complex: following membrane insertion of the first few transmembrane segments of proteins by the SEC61 complex, the MPT complex occludes the lateral gate of the SEC61 complex to promote insertion of subsequent transmembrane regions (By similarity). Within the MPT complex, the PAT subcomplex sequesters any highly polar regions in the transmembrane
domains away from the non-polar membrane environment until they can be buried in the interior of the fully assembled protein (By similarity). Within the PAT subcomplex, CCDC47 occludes the lateral gate of the SEC61 complex (By similarity). Involved in the regulation of calcium ion homeostasis in the ER (By similarity). Required for proper protein degradation via the ERAD (ERassociated degradation) pathway (By similarity). Has an essential role in the maintenance of ER organization during embryogenesis (PubMed:<a href="http://www.uniprot.org/citations/25009997" target="_blank">25009997</a>).

## Cellular Location

Endoplasmic reticulum membrane \{ECO:0000250|UniProtKB:Q96A33\}; Single-pass type I membrane protein. Rough endoplasmic reticulum membrane; Single-pass type I membrane protein

Tissue Location
In the embryo, expressed in the endodermal layer of the yolk sac and in the small intestine.

## Ccdc47 Antibody - C-terminal region - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
