FZD8 / Frizzled 8 Antibody (N-Terminus)
Rabbit Polyclonal Antibody
Catalog # ALS10782

Specification

FZD8 / Frizzled 8 Antibody (N-Terminus) - Product Information

Application	**IHC**
Primary Accession	Q9H461
Reactivity	**Human, Mouse, Monkey, Horse, Xenopus, Bovine**
Host	**Rabbit**
Clonality	**Polyclonal**
Calculated MW	**73kDa KDa**

FZD8 / Frizzled 8 Antibody (N-Terminus) - Additional Information

Gene ID 8325

Other Names
Frizzled-8, Fz-8, hFz8, FZD8

Target/Specificity
Human FZD8 / Frizzled 8. BLAST analysis of the peptide immunogen showed no homology with other human proteins.

Reconstitution & Storage
Long term: -70°C; Short term: +4°C

Precautions
FZD8 / Frizzled 8 Antibody (N-Terminus) is for research use only and not for use in diagnostic or therapeutic procedures.

FZD8 / Frizzled 8 Antibody (N-Terminus) - Protein Information

Name FZD8

Function
Receptor for Wnt proteins. Component of the Wnt-Fzd-LRP5-LRP6 complex that triggers beta-catenin signaling through inducing aggregation of receptor-ligand complexes into ribosome-sized signalosomes. The beta-catenin canonical signaling pathway leads to the activation of disheveled proteins, inhibition of GSK-3 kinase, nuclear accumulation of beta-catenin and activation of Wnt target genes. A second signaling pathway involving PKC and calcium fluxes has been seen for some family members, but it is not yet clear if it represents a distinct pathway or if it can be integrated in the canonical pathway, as PKC seems to be required for Wnt-mediated inactivation of GSK-3 kinase. Both pathways seem to involve interactions with G-proteins. May be involved in transduction and intercellular transmission of polarity information during tissue morphogenesis and/or in differentiated tissues. Coreceptor along with RYK of Wnt proteins, such as WNT1.

10320 Camino Santa Fe, Suite G
San Diego, CA 92121
Tel: 858.875.1900 Fax: 858.875.1999

Cellular Location
Membrane; Multi-pass membrane protein. Golgi apparatus. Cell membrane; Multi-pass membrane protein. Note=Colocalizes with GOPC at the Golgi apparatus.

Tissue Location
Most abundant in fetal kidney, followed by brain and lung. In adult tissues, expressed in kidney, heart, pancreas and skeletal muscle

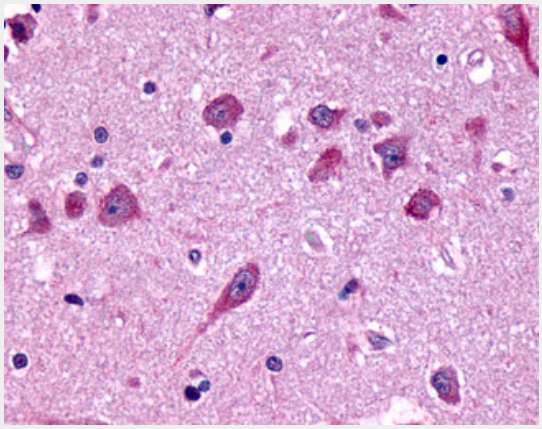
Volume
50 µl

FZD8 / Frizzled 8 Antibody (N-Terminus) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

FZD8 / Frizzled 8 Antibody (N-Terminus) - Images



Anti-FZD8 / Frizzled 8 antibody IHC of human brain, amygdala.
